TOXICOLOGY

Subject index of volume 136

Aging; Host resistance; Immunosuppression; 2,3,7,8-tetrachlorodibenzo-p-dioxin; *Trichinella spiralis* **136**, 15

Analysis of covariance; Organ weight; Toxicity studies; Multivariate analysis; Statistical power **136**, 67

ARDS; Cell permeability; Cytotoxicity; Membrane fluidity; Tricyclic antidepressants; Tight junction **136**, 1

Cathepsins; α_{2u}-Globulin; PBPK modeling; 2,4,4-Trimethyl-2-pentanol **136**, 89

Cell permeability; ARDS; Cytotoxicity; Membrane fluidity; Tricyclic antidepressants; Tight junction **136**, 1

Centrosome; Dimethylarsinic acid; Microtubule; Multipolar spindle; γ-Tubulin **136**, 79

Cerebellar granule cells; PCBs; Intracellular free calcium; Neurotoxicity **136**, 27

Cytotoxicity; ARDS; Cell permeability; Membrane fluidity; Tricyclic antidepressants; Tight junction **136**, 1

Dimethylarsinic acid; Centrosome; Microtubule; Multipolar spindle; γ-Tubulin **136**, 79

2,4-D; Picloram; Submitochondrial particles; Surfactant **136**, 41

Electron microscopy; Liver; Morphometry; PCB 126; 3,3′,4,4′,5-Pentachlorobiphenyl; Rat **136**, 107

Host resistance; Aging; Immunosuppression; 2,3,7,8-tetrachlorodibenzo-p-dioxin; *Trichinella spiralis* **136**, 15

Immunosuppression; Aging; Host resistance; 2,3,7,8-tetrachlorodibenzo-p-dioxin; *Trichinella spiralis* **136**, 15

Intracellular free calcium; PCBs; Cerebellar granule cells; Neurotoxicity **136**, 27

Liver; Electron microscopy; Morphometry; PCB 126; 3,3′,4,4′,5-Pentachlorobiphenyl; Rat **136**, 107

Membrane fluidity; ARDS; Cell permeability; Cytotoxicity; Tricyclic antidepressants; Tight junction **136**, 1
